Introduction

TOPSOIL is a EU cooperation supported by the Interreg VB North Sea Region programme in line with priority 3 of the programme: 'Sustainable North Sea Region, protecting against climate change and preserving the environment'.

More information about the background, the objectives and the work packages of the project can be found by clicking on the '[About](#)' section in the content bar on the left. There you can also find upcoming events, as well as updates on how TOPSOIL is proceeding.

TOPSOIL

Resilient soil and water resources, understanding the water beneath your feet.
